EDUCATION

GALGOTIAS UNIVERSITY

Bachelor of Technology in Computer Science and Engineering (Cumulative GPA: 84.3/10)

Greater Noida, IN

Oct 2021 - June 2025

Relevant Coursework : Data Structures, Software Engineering, Operating Systems, Artificial Intelligence, DBMS, Computer Network

SANTOSH INTERNATIONAL SCHOOL

CBSC - XII

Bulandshahr, IN

Apr 2019 - Mar 2021

WORK EXPERIENCE

Fusion Engineering Tech

iOS Engineer Intern

Bengaluru, IN

Jan 2025 –Mar 2025

- Engineered robust API integration systems that reduced data fetching latency by 45%, enabling real-time content update and enhancing overall user engagement metrics by 35%.
- Architected a full-featured Apple Store application using UIKit, implementing compositional collection views that increased and content density by 40% while maintaining smooth scrolling performance
- Streamlined cross-platform user experience by developing a dedicated music discovery section leveraging Apple Music API, results in 30% faster navigation between app sections and a 25% increase in session duration.
- Implemented advanced caching techniques and pagination algorithms that reduced memory usage by 50%, optimizing app and performance across multiple device generations while maintaining 99.8% crash-free sessions.

INFOSYS

iOS Engineer Intern

Mysore, IN

June 2024 – Aug 2024

- Spearheaded the creation of a comprehensive Hospital Management System using SwiftUI and Supabase, resulting in the alleviated patient data management that improved administrative efficiency by reducing paperwork processing time by 20 hours per week.
- Enhanced communication between cross-functional teams, driving the completion of 15+ pivotal projects within tight deadlines leveraged **JIRA** for effective project tracking and enhanced team collaboration in an agile setting.
- Developed sleek interface designs that refined navigation efficiency within the app; led to a reduction in help desk tickets related to user experience issues, addressing over 200 inquiries monthly.
- Optimized database queries and implemented advanced caching techniques, reducing app load time by 35% and improving realtime appointment scheduling efficiency by 25%, leading to a 40% increase in user satisfaction ratings.

PROJECTS

Twitter Replica (iOS) || SwiftUI & Firebase

Feb 2025

- Engineered a high-performance Twitter clone using SwiftUI and Firebase that enabled real-time tweet posting and liking and also functionality, achieving 99.7% reliability and 40% increased user engagement.
- Developed a sophisticated user discovery system with image upload capabilities that reduced search latency by 35% while supporting multiple image formats and maintaining GDPR compliance.

Hospital Management System (iOS) || SwiftUI & Supabase

July 2024

- Developed a dual-version iOS hospital management app (for patients and doctors) in 4 weeks using Swift, Uikit and Supabase, & advanced networking technologies for better connection within the hospital or low networking areas.
- Powered patients to book and manage appointments, while enabling doctors to track schedules in real-time, improving the and workflow efficiency by 30%

SKILLS

Programming Languages: C++, Swift, JavaScript, Html, Python, Git, Tailwind, React, C

Development: iOS Development, Web Development.

Tools/Platforms/Database: Vercel, MySQL, MongoDB, Postman, Supabase, Firebase.

ACTIVITIES

GRAPHEX DESIGN CLUB | Technical Lead,

Oct 2022 – Oct 2024

Designed engaging graphics & intuitive UI/UX layouts with Figma and Illustrator, enhancing brand identity for club projects
