Software Engineer iOS Developer

Galgotias University

Computer Science And Engineering

Oct 2021 – Present

Greater Noida , Uttar Pradesh

Relevant Coursework

- Data Structures
- Software Methodology
- iOS Development
- Database Management
- Artificial Intelligence
- Internet Of Things
- Systems Programming
- UI/UX Design
- Agile Model
- Jira

Experience

Infosys

June 2024 – July 2024

Software Engineer Intern

Mysore, Karnataka

- As an intern at Infosys, I developed a comprehensive hospital management application that streamlined patient and hospital data management. I utilized Firebase for robust database management, ensuring secure and scalable data storage. I designed the user interface and experience using Figma, focusing on intuitive and user-friendly layouts. I implemented the application with Swift UI, creating a seamless and efficient experience for users. This project allowed me to enhance my technical skills, particularly in integrating various technologies to build a cohesive and functional application.
- I spearheaded the development of a hospital management app aimed at optimizing patient and administrative workflows. Leveraging Firebase, I ensured the app had a robust and scalable backend capable of handling large volumes of data securely. My role involved crafting the app's design using Figma, where I focused on creating an intuitive user interface that would facilitate easy navigation and accessibility for medical staff and administrators..

Projects

Hospital Management App | *Swift, Firebase, Figma, Swift UI*

June-July 2024

- * Developed a comprehensive hospital management app during my internship with Infosys to efficiently manage patients, doctors, and administrative tasks.
- * Utilized Firebase as the Backend for real-time data synchronization Designed and developed the app interface using Swift UI and Figma
- * Implemented features for patient tracking, doctor scheduling, and administrative management.

CybWare | *Swift UI, Firebase, Figma*

Jan-May 2024

- * Developed Cybware, a cybersecurity awareness app focused on educating users about online safety and best practices.
- * Implemented Firebase for secure data storage and user verification, ensuring smooth and reliable authentication processes..
- * Built the app using Swift UI Kit, creating an intuitive and user-friendly interface for an enhanced user experience..

Twitter Replica | *Swift, Swift UIKit,*

January 2025

- * Engineered a high-performance Twitter clone using SwiftUI and Firebase that enabled real-time tweet posting and liking and also functionality, achieving 99.7 percent reliability and 40 percent increased user engagement.
- * Technologies Used: Swift, SwiftUI, Core Data (or other backend as applicable), Combine, and Firebase (if using for backend services)
- * Features : Real-time synchronization of expense data across devices. Secure account management with authentication and user profiles.

Technical Skills

Languages: C++, , Swift, HTML/CSS, JavaScript, Python

Developer Tools: VS Code, Eclipse, XCode, Figma

Technologies/Frameworks: Linux, GitHub, JUnit

Leadership / Extracurricular

Team Lead

January 2024 – July 2024

Lead

Galgotias University

- * Collaborated with team members using version control systems such as Git to organize modifications and assign tasks.
- * Utilized Xcode as a development environment in order to visualize the application in both iOS and Android
